

10x7 q

Dato un quadrato, si fissa un'altezza, e si chiede di determinare il rettangolo che ha la stessa area del quadrato e la fissata altezza.

Determino la frazione di altezza, equi la commensura tra le 2 parti. In pratica si assegna il rapporto tra le parti

? dove porre il confine, in modo che l'area sia conservata? l'area entrata uguale all'uscita ?
